Market Overview

The San Gabriel Valley ENT market encompasses 337,507 total claims across 420 active providers and 609 sites of service, serving 83,280 unique patients. The market has a 13.6% overall surgical rate and 12.5% oncology rate. The top five organizations control 49.2% of total visit volume, indicating a moderately concentrated market with Keck Medicine of USC leading at 12.5% market share.

Market Snapshot

Total Claims	337,507	Active Providers	420
Total Patients	83,280	Sites of Service	609
Surgical Rate	13.6%	Oncology Rate	12.5%
Top 5 Org Share	49.2%	Market Leader	Keck Medicine of USC

Top Provider Organizations

Rank	Organization	Visits	Mkt %	Surg %	Providers
1	Keck Medicine of USC	20,013	12.5%	42.7%	21
2	Geoffrey Trenkle DO	15,638	9.8%	8.7%	4
3	ENT Surgical Association	15,426	9.6%	4.1%	3
4	Jahangir Sharifi MD	15,219	9.5%	4.3%	2
5	Veling Tsai MD	12,450	7.8%	3.3%	2
6	Steven A. Battaglia MD	10,288	6.4%	8.3%	2
7	Covina ENT Medical	8,267	5.2%	2.2%	1
8	East LA ENT Medical Ctr	7,478	4.7%	3.8%	1
9	Ted Shen MD	7,011	4.4%	18.8%	1
10	Lewit Worrell MD	5,132	3.2%	2.4%	1

Laryngoscopy Procedure Landscape

Laryngoscopy procedures represent a significant segment of the SGV ENT market, totaling 15,053 cases across 18 distinct CPT codes and 122+ active providers. The procedure mix spans from diagnostic flexible laryngoscopy (CPT 31575) as the dominant volume driver at 11,378 cases, to specialized therapeutic procedures including stroboscopy, injection augmentation, and direct operative laryngoscopy with excision.

Laryngoscopy CPT Code Volumes

CPT	Description	Cases	Providers	Mkt %
31575	Flexible laryngoscopy, diagnostic	11,378	122	7.1%
31579	Flexible/rigid telescopic w/ stroboscopy	2,665	37	1.7%
31525	Direct laryngoscopy, diagnostic	325	31	0.2%
31536	Direct operative w/ biopsy + microscope	153	29	0.1%
31574	Flexible w/ injection augmentation	151	12	0.1%
31541	Direct operative w/ excision of tumor	143	28	0.1%
31573	Flexible w/ therapeutic injection	124	5	0.1%
31535	Direct operative w/ biopsy	95	27	0.1%
31571	Direct w/ vocal cord injection + microscope	88	20	0.1%
31526	Direct diagnostic w/ operating microscope	59	19	<0.1%
31528	Direct w/ dilation, initial	49	8	<0.1%
31505	Indirect laryngoscopy, diagnostic	43	4	<0.1%

Key Insight: CPT 31575 (diagnostic flexible laryngoscopy) accounts for 75.6% of all laryngoscopy volume, performed by 122 providers. The second highest-volume code, CPT 31579 (stroboscopy), is performed by only 37 providers, indicating a more specialized subset of practitioners. Therapeutic and operative codes (31573, 31574, 31541) are concentrated among even fewer providers, reflecting subspecialty expertise in voice disorders and laryngeal surgery.

Laryngoscopy Provider Leaders

The top 15 providers account for a significant share of the 15,053 total laryngoscopy procedures in the San Gabriel Valley. Provider profiles reveal distinct practice patterns, from highly specialized laryngologists like Dr. Karla O'Dell (63.4% of practice in laryngoscopy) to high-volume generalist otolaryngologists like Dr. Veling Tsai (8.5% of practice) who drive significant absolute case numbers through broader ENT practices.

Top 15 Providers by Laryngoscopy Volume

Ran k	Provider	Organization	Cases	Total Visits	% Practice	Mkt Share
1	O'Dell, Karla	Keck Medicine of USC	1,328	2,095	63.4%	8.8%
2	Mendelsohn, Abie	Geoffrey Trenkle DO	1,069	4,113	26.0%	7.1%
3	Tsai, Veling	Veling Tsai MD	1,051	12,433	8.5%	7.0%
4	Yao, Shounan	East LA ENT Medical Ctr	927	7,478	12.4%	6.2%
5	Koutnouyan, Hrair	ENT Surgical Assoc	597	4,481	13.3%	4.0%
6	Kokot, Niels	Keck Medicine of USC	584	2,312	25.3%	3.9%
7	Kalantar, Nader	ENT Institute CA	500	3,801	13.2%	3.3%
8	Maghami, Ellie	City of Hope	493	2,101	23.5%	3.3%
9	Battaglia, Steven	Steven A. Battaglia MD	485	7,244	6.7%	3.2%
10	Sharifi, Jahangir	Jahangir Sharifi MD	477	13,626	3.5%	3.2%
11	Farnoosh, Soroush	Geoffrey Trenkle DO	395	5,093	7.8%	2.6%
12	Gernon, Thomas	City of Hope	389	1,935	20.1%	2.6%
13	Shen, Ted	Ted Shen MD	383	7,011	5.5%	2.5%
14	Johns, Michael	Keck Medicine of USC	376	570	66.0%	2.5%
15	Yeh, James	James S Yeh MD	363	4,335	8.4%	2.4%

Provider Deep Dives: Top 5

1. Karla O'Dell, MD | Keck Medicine of USC

Dr. O'Dell is the market's leading laryngoscopist with 1,328 laryngoscopy cases (8.8% market share) and the highest practice concentration at 63.4%. She is a voice and swallowing subspecialist with 2,095 total visits, 1,520 surgical (72.6% surgical rate), and 287 oncology visits. Her top procedures include stroboscopy (CPT 31579: 796 cases), diagnostic flexible laryngoscopy (CPT 31575: 399), and tracheobronchoscopy (CPT 31615: 107). Top diagnoses include dysphonia (R490: 351), dysphagia (R1310: 184), and laryngeal stenosis (J386: 156).

Site	Type	Submarket	Visits	Surgeries
Keck Hospital of USC	Hospital	Downtown LA	1,404	1,058
Central Surgery Ctr Glendale	ASC	Glendale	455	348
Colorectal Surgery Institute	ASC	Glendale	269	191
USC Verdugo Hills Hospital	Hospital	Glendale	59	15
USC Norris Cancer Center	Cancer Ctr	Downtown LA	12	1

Clinical Trial Activity

Dr. O'Dell is the most research-active laryngoscopist in the market, currently leading multiple clinical trials at the USC Voice Center:

Trial / Study	Status	Phase	Description
Renuva Injectable Fat Matrix	Active (PI)	Phase II	Evaluating Renuva as an off-the-shelf injectable alternative to harvested fat for treating glottal insufficiency. Early results reported as promising.
PRP Vocal Fold Rejuvenation	Completed (2022)	Phase II	Platelet-rich plasma injections to rejuvenate vocal fold tissue loss from scar and aging. Followed the earlier Silk Voice trial.
Airway Stenosis Optimization	Active	Clinical Outcomes	Optimizing treatment protocols for subglottic and tracheal stenosis, including intralesional corticosteroid injection studies.
Minimally Invasive Laryngeal Therapeutics	Active	Clinical Outcomes	Novel office-based injectable therapeutics for laryngeal conditions, advancing in-office laser and injection procedures.

2. Abie Mendelsohn, MD | Geoffrey Trenkle DO Group

Dr. Mendelsohn ranks second with 1,069 laryngoscopy cases (7.1% market share), with 26.0% practice concentration. He has 4,113 total visits, 445 surgical (10.8% surgical rate), and 580 oncology visits across 2,339 unique patients. His laryngoscopy work is heavily weighted toward stroboscopy (CPT 31579: 867 cases). Key diagnoses include allergic rhinitis (J309), neck masses (R221), and obstructive sleep apnea (G4733). His referral network is anchored by the Geoffrey Trenkle DO organization, with Optumcare and JWCH Institute as top external referral sources.

Site	Type	Submarket	Visits	Surgeries
LA Center for ENT	Clinic	Downtown LA	2,928	0
Adventist Health White Memorial	Hospital	Downtown LA	844	346
Employee Medical Consultants	Clinic	Downtown LA	522	0
Huntington Hospital	Hospital	Pasadena	80	65
Plaza Surgical Medical Ctr	ASC	San Gabriel	48	44

Clinical Trial Activity

Dr. Mendelsohn has published research tied to prospective clinical trials, primarily in head and neck oncology. While not listed as a principal investigator on registered ClinicalTrials.gov studies, his research output includes co-authorship on a Phase Ib/II trial of neoadjuvant radiation plus immunotherapy (SBRT + durvalumab) for HPV-positive oropharyngeal cancer, as well as studies on circulating tumor tissue modified viral (TTMV)-HPV DNA for post-treatment cancer surveillance. He has also published on local anesthetic infusion protocols for pain management in head and neck cancer surgery, contributing to clinical pathway optimization in the TORS (transoral robotic surgery) space.

3. Veling Tsai, MD | Veling Tsai MD (Independent)

Dr. Tsai is the highest-volume ENT in the market overall at 12,433 total visits with 1,051 laryngoscopy cases (7.0% market share). Laryngoscopy represents just 8.5% of his broad practice, which spans general otolaryngology including audiometry, nasal endoscopy, and tonsillectomy. His 1,027 diagnostic laryngoscopies (CPT 31575) make him the single highest-volume provider for that code. He operates primarily from Caring ENT clinic in Alhambra, with surgical cases at San Gabriel Valley Medical Center.

Site	Type	Submarket	Visits	Surgeries
Caring ENT	Clinic	San Gabriel-MP	12,565	0
San Gabriel Valley Med Ctr	Hospital	San Gabriel-MP	424	377
Garfield Medical Center	Hospital	San Gabriel-MP	61	11
Alhambra Surgery Center	ASC	San Gabriel-MP	46	12
Alhambra Hospital Med Ctr	Hospital	San Gabriel-MP	21	12

Clinical Trial Activity

No clinical trial involvement identified. Dr. Tsai operates a high-volume community ENT practice with a clinical faculty appointment at UCLA. His profile is that of a community-based generalist otolaryngologist focused on clinical care delivery rather than academic research.

4. Shounan Yao, MD | East Los Angeles ENT Medical Center

Dr. Yao contributes 927 laryngoscopy cases (6.2% market share) from a general ENT practice of 7,478 total visits. His 919 diagnostic laryngoscopies (CPT 31575) place him among the top three for that code. He has a distinctly broad diagnostic mix including croup (J050: 1,049 cases), allergic rhinitis (J309: 1,353), and sensorineural hearing loss (H903: 702), suggesting a large pediatric and general ENT population. His primary clinic is East Los Angeles ENT Medical Center in San Gabriel, with surgical volume at San Gabriel Valley Medical Center and Monterey Park Hospital.

Site	Type	Submarket	Visits	Surgeries
East LA ENT Medical Center	Clinic	San Gabriel-MP	7,530	0
San Gabriel Valley Med Ctr	Hospital	San Gabriel-MP	186	154
Monterey Park Hospital	Hospital	San Gabriel-MP	110	76
USC Arcadia Hospital	Hospital	Arcadia	73	28
Alhambra Surgery Center	ASC	San Gabriel-MP	18	7

Clinical Trial Activity

No clinical trial involvement identified. Dr. Yao's East Los Angeles ENT Medical Center is a community practice focused on clinical care delivery. His broad diagnostic mix including pediatric conditions (croup) and general ENT suggests a patient population oriented toward primary otolaryngology rather than research-eligible subspecialty cases.

5. Hrair Koutnouyan, MD | ENT Surgical Association

Dr. Koutnouyan rounds out the top five with 597 laryngoscopy cases (4.0% market share) from 4,481 total visits. His practice is Glendale-based, with 554 diagnostic flexible laryngoscopies (CPT 31575) and a diagnostic mix that includes tinnitus (H9313), deviated septum (J342), and atypical facial pain (G501). He has a strong primary care referral network, with top referral sources from family medicine practices including Armine Nazaryan MD, Anait Galfaian, and Lakeside Medical Organization. His surgical volume is centered at Adventist Health Glendale.

Site	Type	Submarket	Visits	Surgeries
ENT Surgical Associates	Clinic	Glendale	4,290	0
Adventist Health Glendale	Hospital	Glendale	339	182
Physicians Surgery Ctr Glendale	ASC	Glendale	69	28
Adventist Health White Memorial	Hospital	Downtown LA	25	1
USC Verdugo Hills Hospital	Hospital	Glendale	13	5

Clinical Trial Activity

No current clinical trial involvement identified. Dr. Koutnouyan has historical publications (eutectic anesthetics, skull metastasis case reports) but no active registered trials. His community practice at ENT Surgical Associates in Glendale includes a functional medicine orientation but is not currently engaged in clinical research.

Clinical Trial Landscape: Top 5 Providers

A review of public clinical trial registries and published research reveals a significant disparity in research activity among the market's top laryngoscopy providers. Academic-affiliated providers, particularly those at Keck Medicine of USC, are driving clinical innovation through active trials and peer-reviewed publications, while community-based practitioners remain focused on clinical care delivery without visible research engagement.

Clinical Trial Activity Summary

Provider	Organization	Trial Activity	Research Focus
O'Dell, Karla	Keck Medicine of USC	Active (PI on 3+ trials)	Renuva injectable, PRP vocal fold rejuvenation, airway stenosis optimization, minimally invasive laryngeal therapeutics
Mendelsohn, Abie	Geoffrey Trenkle DO	Published (co-investigator)	HPV+ oropharyngeal cancer immunotherapy (Phase Ib/II), TTMV-HPV DNA surveillance, TORS pain management protocols
Tsai, Veling	Veling Tsai MD	None identified	Community practice; no registered trials or recent research publications
Yao, Shounan	East LA ENT Medical Ctr	None identified	Community practice; broad general and pediatric ENT focus
Koutnouyan, Hrair	ENT Surgical Assoc	None identified	Community practice; historical publications only, no active trials

Key Research Insights

O'Dell as the innovation leader: Dr. O'Dell is the only top-5 provider actively leading registered clinical trials. Her Renuva trial for glottal insufficiency and PRP vocal fold rejuvenation work position her at the forefront of laryngeal therapeutics innovation. These trials directly align with her high-volume stroboscopy and injection augmentation practice (CPT 31579, 31574, 31573).

Mendelsohn bridges clinical practice and oncology research: While not a PI on registered trials, Dr. Mendelsohn's co-authorship on Phase Ib/II immunotherapy trials and HPV DNA surveillance studies signals meaningful engagement with the academic research ecosystem. His 580 oncology visits provide a clinical foundation for this research involvement.

Community providers represent an untapped research opportunity: Tsai (12,433 visits), Yao (7,478 visits), and Koutnouyan (4,481 visits) collectively see over 24,000 patients annually with no clinical trial engagement. Their high patient volumes could support future trial enrollment efforts if partnerships with academic centers were established.

Research activity correlates with academic affiliation: The two providers with research activity (O'Dell and Mendelsohn) are both affiliated with academic health systems (Keck/USC and the broader LA academic ecosystem). This pattern suggests that clinical trial expansion in the SGV market would benefit from academic-community partnership models.

Key Findings & Strategic Takeaways

Academic dominance in surgical laryngoscopy: Keck Medicine of USC holds three of the top six laryngoscopy providers (O'Dell, Kokot, Johns) and leads in surgical intensity with a 42.7% surgical rate. Keck Hospital is the single highest-volume surgical site in the market.

Concentration vs. breadth: Providers like O'Dell (63.4%) and Johns (66.0%) are highly specialized laryngologists, while Tsai (8.5%) and Sharifi (3.5%) drive large absolute volumes from broad general ENT practices. Targeting strategies should differentiate between these practice profiles.

Geographic clustering: Laryngoscopy volume clusters in three corridors: Downtown LA (Keck, Adventist Health White Memorial), San Gabriel-Monterey Park (Caring ENT, East LA ENT, San Gabriel Valley Medical Center), and Glendale (ENT Surgical Associates, Adventist Health Glendale, Central Surgery Center).

Stroboscopy as a differentiator: CPT 31579 (stroboscopy) is performed by only 37 providers vs. 122 for diagnostic laryngoscopy, and is heavily concentrated among subspecialists (O'Dell: 796 cases, Mendelsohn: 867 cases). This code signals voice disorder specialization and higher acuity patients.

Referral network insights: Top providers receive referrals from diverse primary care networks. Koutnouyan has the strongest family medicine referral pipeline, while O'Dell and Kokot receive more inter-specialty and academic referrals through Keck.
